

## **Counterbalance Forklift License Kelowna**

Counterbalance Forklift License Kelowna - Forklifts, when operated by completely trained workers, are a major advantage to companies. We offer a thorough training program consisting of all parts of operating a powered lift device. Counterbalance forklift training offers operators of forklifts with the practical skill and knowledge required to efficiently and safely operate forklifts. The program provides a combination of classroom theory, participant observation and hands-on training in a warehouse-type setting. Training can be customized and/or on site.

The course goes through the lift truck essentials, regulations and rules, components, load centres and factors affecting stability. Procedures regarding the general operation of the forklift is taught, in addition to startup, circle checks, shutdown, forward/reverse on level ground, and operating around other people. Load handling subject matters include load pickup and placement, selection of loads, load security and integrity, loading and off-loading trailers. Individuals participating will learn operational maintenance procedures, such as refueling and recharging. Workplace safety issues will be talked about. Those participating will know the environmental conditions affecting lift truck performance and be able to identify potential dangers. Advanced training on propane handling can be included.

Both employees and employers can face severe penalties if industry and national guidelines are not followed in the operation of forklifts. Employees who operate a reach truck or forklift ought to be knowledgeable regarding the rules about their safe operation. Training is recommended for any individual applying for a job which requires forklift operation.

Inside our small personalized classes, we offer both in-class theory and hands-on training. The options for personalized training will comprise entry level or refresher courses.

### **Entry-level Course Outline:**

For anyone entering the workforce as an operator of a counterbalance forklift, this training course is for you. The successful student should pass a series of practical and written tests in order to complete the program. Subject matter includes: fundamentals of powered lift trucks; general operating procedures; load handling; operational maintenance; basic rules and regulations, workplace safety.
