Order Picker License Kelowna

Order Picker License Kelowna - Order preparation operation or likewise called order picking as it is more normally known is a method used in warehouse operations and consists of employees called order pickers. The order picker's duty is to take and collect articles in certain quantities to be able to fulfill the client's orders prior to shipment. Order picking is a simple warehousing process. The efficiency in which this particular job is done can be directly connected to the productivity of a supply chain. Therefore, order picking is one of the most controlled logistic processes. Order picking falls within the category of the warehouse management system.

There are specific kinds of order picking which include: wave picking method, pick to box method, picker to part method or piece picking, zone picking method and sorting systems method.

The pick to box method comprises the order picker only filling the boxes with stuff which are from their particular station. The box then moves on to other locations to until the order is done. In this method, there is no movement of the order picker employees. In the wave picking method, the order pickers move around so as to collect the needed products for numerous orders. The piece picking or picker to part method is similar where the order pickers or picker move to gather the items required but for one order only.

In the sorting systems method, there is no movement of the order picking workers. Instead, the products are brought to him or her via an automated system such as a conveyor system or an automatic storage. In the zone picking method, every order picker is assigned to one specific zone. They are responsible for just realizing order picking within this particular area.
