

Manlift Operator Certification Kelowna

Manlift Operator Certification Kelowna - We provide a scissor platform and aerial lift training and certification to empower the trainee with the general understanding and knowledge of the safe and efficient utilization of "Power Operated Mobile Work Platforms," in accordance to the existing regulations in the industry. Upon successful completion of training, those participating will be able to understand and know particular safety and health related dangers associated with operating aerial and scissor lifts.

There is likely various institutions that offer individuals in your region with manlift operator certification programs. The trainee will receive in-depth instruction about the safe use and regulations in addition to field training. The knowledge and skill level of every trainee is assessed and people who are capable of demonstrating a satisfactory level of operational ability will receive Operator Certification cards and employee documentation.

Theory Training

The trainer guides those training through a comprehensive and interactive review throughout the theory training. The operator course book is studied that covers all relevant regulations. Other subject matters such as various equipment types in addition to different sizes and associated applications, safe operating procedures, pre-use checks and general work place safety are individually explored.

Theory Evaluation

The evaluation of the theory parts starts with a written exam, that focuses on the course concepts which was included in the reference guidebook. Exams are graded and returned to the trainee. The tests are then reviewed to guarantee understanding and a minimum score of 70 percent is needed in order to pass this portion of the training.

Practical Training

The hands-on part of the program is included in the practical training. Here, trainees are shown the safe operating procedures, the parking and shutdown measures and the pre-use inspection measures. Each trainee has the chance to operate the machine and practice the skills they learned throughout Theory Training under the helpful eye of the course trainer in an environment that is safety controlled.

Practical Evaluation

The Practical Evaluation is where the ones training are assessed to assure they have reached a minimum level of skill. The trainees are then evaluated on an individual basis using the machine in a reasonably difficult course setting. After the evaluation is complete, the trainees are de-briefed and given the opportunity to deal with whichever issues they may have regarding any part of the course. Each successful trainee's employer would be given the official documents and records immediately after the course has been finished.
